

# CompuMail officially Tech Lock Certified!

**July 12, 2010**

Concord, CA – Compumail Information Services, Inc. (CompuMail) announces the completion of its Tech Lock Certified™ Program for the Collections and ARM industry. The Collections and ARM industry must comply with multiple federal and state laws and regulations, in addition to industry standards and contractual requirements.

Addressing each regulation individually is both time consuming and cost prohibitive. CompuMail has integrated a compliance matrix to address all applicable data security requirements into a single audit – the Tech Lock Certified program. Our commitment to this program allows CompuMail clients to remain focused on their core business.

With CompuMail being Tech Lock Certified you no longer need to worry about the security of your data. The program tests and ensures that CompuMail is certified to the following programs:

1. PCI DSS
2. GLBA
3. FISMA/NIST SP800-53
4. Red Flags Rule
5. HIPAA
6. HITECH Act
7. Minnesota Plastic Card Security Act
8. Nevada Senate Bill No. 227
9. Massachusetts 201 CMR 17.00
10. ISO 27002

The certification process begins with, Tech Lock's seasoned information security professionals performing a comprehensive on-site assessment. The assessment looks for compliance gaps pertaining to all applicable regulations and standards.

Tech Lock's security auditors are PCI Qualified Security Assessors and hold numerous technical certifications. All auditors possess years of collection management systems experience. This makes Tech Lock auditors uniquely qualified to assess collection and ARM-related companies. In addition to auditing expertise, they also understand applicable laws, the everyday realities of an ARM company, as well as the strengths and weaknesses of the predominant ARM software providers and vendors.

CompuMail being Tech Lock Certified is a win-win for Collection and ARM companies and service providers. CompuMail clients save time and resources by providing their CompuMail/Tech Lock Certified report to current and potential clients instead of filling out numerous security questionnaires with different formats. Collection and ARM companies can ensure compliance with multiple regulatory requirements that require third party assessments when sensitive information is being transferred.

For additional information on the CompuMail/Tech Lock Certified Program and what it means to you, contact Jason Rhodes or Chris Cochran at 925-689-7100.
